

MINI LETTER
bunting

1. Select a suitable paper, we would recommend printing on cardstock.
2. Print the required amount of bunting, ensure you select the correct paper size and stock type in your printer settings.
3. Cut out the bunting along the outer edge, this is best done with a craft knife and metal ruler or a guillotine.
4. Score along the centre of each piece of bunting with a craft knife and metal ruler, using the corners as a guide.
5. Fold bunting in half and place string along the fold.
6. Glue one side of the bunting and press together until dry.
7. Attach each end of the string to your wooden skewers or to a straw, adjust tightness as required.
